# EXECUTIVE SUMMARY: AMAZON REVENUE & FULFILLMENT ANALYTICS PLATFORM

## Project Overview:

This project transformed raw, unorganized e-commerce operational data into a high-performance relational analytics database and an executive-ready Power BI reporting engine. By resolving critical schema errors, standardizing geography, and analysing fulfilment pathways, the project delivers clear visibility into top revenue drivers, operational bottlenecks, and unfulfilled revenue leaks.

## High-Level Key Metrics:

| | | |
|---|---|---|
| **Total Processed Orders** | **120,378** | Base of 128,975 line-item transaction records. |
| **Net Realized Revenue** | **71.67M** | Net of cancelled and unfulfilled customer orders. |
| **Order Cancellation Rate** | **15.23%** | Represents **6.92M** in lost gross revenue potential. |
| **Top Product Category** | **Set (49.9%)** | Generates half of total revenue (**35.73M**). |
| **Fulfillment Channel Split** | **70.6% FBA** | Amazon Fulfillment dominates over direct Merchant Shipping. |

## Key Business Takeaways & Strategic Recommendations:

### **1.** Product Portfolio Concentration

**-> Insight:** Revenue is heavily concentrated in two categories—**Set** (**49.9%**) and **Kurta** (**29.7%**). Combined, they generate over **79% of total revenue**.

**-> Action:** Reallocate inventory purchasing capital toward *Sets* and *Kurtas*, while optimizing or discounting low-performing inventory like *Sarees* and *Dupattas*.

### **2.** Operational Leakage & Cancellations

**-> Insight:** A **15.23% cancellation rate** leaks nearly **$7M in gross sales,** primarily stemming from processing delays prior to courier handoff.

**-> Action:** Implement automated stock-level syncs between the warehouse and Amazon Seller Central to prevent out-of-stock cancellations.

### **3.** Fulfillment Strategy (FBA vs. Merchant)

**-> Insight:** Amazon FBA accounts for **70.6% of net revenue** and demonstrates higher delivery completion rates compared to merchant-fulfilled (*Easy Ship*) orders.

**-> Action:** Transition higher-margin SKUs from Merchant Fulfillment to Amazon FBA to leverage faster shipping times and lower cancellation rates.
